

Significant Changes to the International Fire Code, 2015 Edition

Description

The purpose of *Significant Changes to the International Fire Code® 2015 Edition* is to familiarize fire officials, building officials, plans examiners, fire inspectors, design professionals, and others with the many important changes in the 2015 International Fire Code® (IFC®). This publication will assist code users in identifying the specific code changes that have occurred and, more important, assist them in understanding the reasoning behind the changes. It is also a valuable resource for jurisdictions in their code-adoption process.

Goal

This seminar provides an overview of critical concepts included in the *Significant Changes to the International Fire Code® 2015 Edition*. The participants will learn the correct use of the code's requirements in the design, plan review, inspection and analysis of projects. They will apply the code in clear-cut situations and build their understanding of the intent of the code when asked to make compliance decisions.

Duration: 1 day

CEUs: 0.6

Contact Hours: 6

Objectives

Upon completion, seminar participants will be better able to:

- Explain the intent and application of the new and revised requirements in the 2015 IFC.
- Identify the specific code changes that have occurred between the 2015 and 2012 editions of the IFC.
- Review the code changes approved by the ICC membership.
